

# ADVANCED HEATING, INC.

Advanced Heating, Inc. – Elkhart, IN has been green since 1992 and getting greener.

We offer **Puron** products (the environmentally friendly refrigerant since 1996) by Bryant Heating and Cooling Systems. Puron is a non-ozone depleting refrigerant. This is 410A refrigerant for the air conditioner that the government has mandated the start of using and will be the only refrigerant for the near future. This will make customers upgrade to a more energy efficient A/C and it will also be better for the ozone.

Installing Hybrid Heat Pump System by Bryant Heating and Cooling System since 1996. The Dual Fuel System of Electric and Natural Gas with help in reducing a “carbon footprint” in a home.

Calculations of loads and operational costs are done on homes for the best energy efficient heating and cooling system to install. This will save the consumer on utilities that would result in a quick payback on the home system cost.

We help the customer determine which Indoor Air Quality products are needed for their home. With the housing envelope more tightened, it is important to better the air quality indoors. Humidifiers installed to protect wood furnishings, help people with sinusitis become more comfortable, and aid in reducing dry eyes and skin for the homeowner. U.V. light purifiers installed to help eliminate mold and odors in the home. Perfect Air Purifiers installed to “capture and kill” airborne viruses, bacteria, allergens, mold, and odors. The IAQ systems are making consumers indoor air cleaner to breathe than outdoor air for a healthier indoor lifestyle.

Recycling old furnaces, air conditioning units, cardboard and miscellaneous metal that is used in building a new home or replacing old units in existing homes, cuts back on land fill garbage.
