

- **Solar Panels**

We offer a variety of solar module solutions to power your home through solar electricity. With top-performing solar panel brands including Kyocera, Sharp, SolarWorld and EverGreen Solar, and a variety of mounting options, like roof mount, ground mount or tracking, these PV systems can be designed to meet any electrical requirement.

- **Wind Generators**

Wind generators convert the kinetic energy in the wind into mechanical power, and with moving parts, quality is extremely important. Our wind generators include Bergey Windpower, Kestrel Wind Turbines, Evance Iskra and Skystream.

- **Solar Thermal**

Solar thermal energy uses the light from the sun heat water, air or your home. We carry complete solar thermal systems from Apricus Solar Hot Water, SolarHot water systems, Quietside Water Heater, and SUN Equinox heating system.

- **Renewable Energy Batteries**

Quality batteries are important to keep power going when power is not being generated in a renewable energy system. We carry top quality Solar-One, Surrette Rolls, Trojan and Sun-Xtender batteries.

- **Inverters**

Inverters are arguably the “heart” of a renewable energy system as they convert the power collected into usable AC power. Our outstanding line of inverters includes OutBack Power Systems, SMA-America and Cotek.
