Rinnai

www.foreverhotwater.com

SAVE ENERGY & MONEY WITH RINNAI TANKLESS WATER HEATERS

- Rinnai provides hot water only when you need it!

CONTRIBUTE TO CLEANER AIR & A HEALTHIER HOME

- Rinnai produces very low NOx and CO2 emissions.
- Rinnai internal unit uses outdoor air for combustion.

PROTECT NATURAL RESOURCES

- Significantly more energy-efficient than traditional gas and electric water heaters.
- Up to a 20-year service life, a Rinnai is significantly smaller than a tank water heater, thus reducing landfill waste.

Panasonic *WhisperGreen*™ Ventilation Fans

Energy Star® Qualified for Energy Savings

ENERGY STAR qualified products feature super-quiet operation and high CFM-to-Watt efficiency. As an ENERGY STAR partner, all Panasonic fans are ENERGY STAR qualified and labeled accordingly.

Constant CFM Performance

The WhisperGreen™ model features built-in intelligence called SmartFlow™ Optimum CFM Technology. This unique "electronic-brain" lets the fan perform at a constant CFM regardless of elbows and other factors that might hinder performance.

DIAMOND™ Seal Technology

DIAMOND Seal Technology provides a lead-free water delivery system. Once inside the faucet, water is not in contact with potential metal contaminants, keeping the water as pure as it entered. Our InnoFlex waterways are manufactured using an electronic beam versus chemicals to eliminate the potential of adding unpleasant odors or taste. Faucets with DIAMOND Seal Technology provide performance that is leak free, lead free, longer lasting and with less hassle to install, lasting 10 times longer than the industry standard¹.

Washlet®
Clean. Green. Comfort.

The Washlet toilet seat fits any standard toilet and uses clean water to cleanse you like never before. Just reach for the remote, select the area you want to wash, push another button and warm air dries you.

An Independent study has shown that the average family of four uses 183 rolls of toilet paper a year, which amounts to 1.3 trees. The Washlet uses water to cleanse and refresh and can significantly reduce the consumption of toilet paper.

HIGH EFFICIENCY FLUSHING TECHNOLOGY

TOTO's rigorous flushing performance testing methods have proven to be more extensive than current industry standards, helping to ensure outstanding one-flush performance and true water savings. Most recently the EPA has integrated some of TOTO's stringent methods into its testing protocols.

TOTO toilets use a significantly lower volume of water than the standard and their three gravity-based High Efficiency 1.28 GPF flushing systems – Double Cyclone®, E-Max™ and Dual-Max® – provide quiet, powerful, efficient one-flush performance.

THE FLOWISE™ FLUSHING SYSTEM

The FloWise Flushing System delivers a forceful yet frugal flush that uses 20% less water than a standard 1.6 GPF toilet, making it ideal for people who want to conserve water – and save money – with every flush. It can save a family of four up to 4,000 gallons of water per year while lowering water bills. Ideal for homes with septic tanks and well water, this system is also perfect for LEED submittal.

FLOWISE™ WATER CONSERVING SHOWERHEADS

Turbine Technology

An invigorating shower experience that uses up to 40% less water! FloWise puts a new spin on water conservation. First, water becomes pressurized as it flows into a small chamber. Then the turbine (water wheel) spins the pressurized water adding to the force. Finally the showerhead disperses the water evenly creating an energizing flow that feels refreshing while saving water, energy and money. FloWise showerheads are perfect for LEED certified projects.
