

Save more energy and extend bulb life with Lutron's Skylark® eco-dim™. Replace a standard switch with eco-dim and save 15% instantly – and use only as much light as you need.

Homeowners are always looking for ways to reduce their growing energy bills without breaking the bank. Watt Stopper/Legrand has the solution. Turn lights off in empty rooms with convenient vacancy, occupancy or time-based controls.

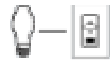

Choose from a wide selection of timeless classics to unique contemporary designs, you can express yourself with Regency Ceiling Fans.

ENERGY STAR rated ceiling fans are about 50% more efficient than conventional fans. And can save you money on utility bills, plus any additional air conditioning or heating savings you may gain when your fan is operated properly.

**Use a halogen bulb with a dimmer where:**

- Light quality is important
- You want energy savings with ambience
- You want to control the light with dimmers, timers or sensors

**Use a screw-in CFL bulb where:**

- Light quality isn't important
- There is no risk of children or animals breaking the bulb
- You want maximum light with minimum energy consumption
- You don't want to control the light with dimmers or sensors

NuTone Ultra Silent fans.  
With Humidity sensing,  
Sensaire® technology

It turns off automatically, and that saves money. Humidity sensing fans are ideal for anyone who leaves the house before humidity is properly vented. With a fan this quiet, you can't forget to turn it off when the job is done. That saves energy, and money.
